FDA Assault on Colloidal Silver – the World's Most Powerful Natural Antibiotic – Accelerates With Latest Raid!

Learn how to beat the FDA at their own game by making your own safe, pure, high-quality colloidal silver, in the comfort and privacy of your own home!

In a massive daylight raid this past year, U.S. Marshalls – acting at the behest of the U.S. Food & Drug Administration and the Federal Trade Commission – swooped down upon and raided the California offices of Seasilver USA, seizing more than 132,000 bottles of Seasilver, one of the most popular silver-based nutritional supplements on the market. According to news reports (http://www.kansascity.com/mld/cansascity/news/breaking_news/6127446.htm) the company's owners were charged with making "false and unsubstantiated claims about the health benefits and safety of Seasilver" – a spurious charge frequently used by the bureaucrats against distributors of silver-based nutritional supplements who persist in pointing out silver's fully documented medical history as the world's most powerful natural antibiotic and infection-fighting agent.

As readers of this newsletter are fully aware, this is not the first time the FDA has acted to clamp down on companies distributing a variety of silver-based nutritional supplements. And it most certainly will not be the last. The FDA's controversial 1999 "final ruling" on colloidal silver – in which the bureaucrats decreed that its powerful infection-fighting qualities could no longer be listed in product advertising or on labeling – gave them virtual carte blanche to enforce a vendetta against distributors of silver-based nutritional supplements. Compliance letters were sent to numerous distributors of colloidal silver products, threatening fines of up to \$100,000 if they continued to inform the public of the powerful antibiotic qualities of colloidal silver. By 2002 many colloidal silver distributors had been driven completely out of business by this onerous and gestapo-like campaign against one of the most medically documented all-natural antibiotic substances on the face of the earth! In short, the makers of Seasilver are only the latest in a *long string* of victims of this ongoing abuse of power by the FDA, leading up to the day when the sale of colloidal silver and other silver-based nutritional supplements will be banned permanently.

What's All of the Fuss About?

So, what is colloidal silver? Why is it so controversial? And why is the FDA so all-fired intent on putting colloidal silver distributors out of business? If you are unfamiliar with the long-running battle over colloidal silver between alternative medicine advocates and the FDA, the answers to these questions will probably surprise you. And you may be even more surprised to learn that there is a safe, simple way to make your own high-quality antibiotic colloidal silver in the comfort and privacy of

your own home – *for only pennies*. What’s more, the FDA can’t do a thing about it *if* you act now before they make the means of production illegal. Here’s the whole fascinating story...

What IS Colloidal Silver, Anyway? And How Was it Discovered?

For readers who may be unfamiliar with colloidal silver and its powerful infection-fighting qualities, a little background is in order. First of all, it is important to understand that the antibacterial qualities of pure silver have been widely known for literally thousands of years. And in spite of protestations to the contrary by the FDA, those antibacterial qualities are still widely recognized worldwide today. For example, in the days of the Roman legions silver coins were placed into water containers to prevent bacterial contamination of the drinking water during their long marches into war. And today, silver-based water filtration systems are used in NASA space flights to help prevent bacterial contamination of the astronaut’s drinking water during their long journeys into space!

Before modern refrigeration was invented, farmers and pioneers often placed silver coins into their milk buckets to help prevent rapid spoilage of the milk after milking their cows. Today, the famous Kiplinger Letter for businessmen states, in an article titled ***Big Business to Move Into Silver in a BIG Way***, “*Silver's germ-fighting ability will soon get a workout in new uses. The metal kills disease-carrying microbes without the harmful side effects of chlorine, or other sanitizing chemicals. Silver will one day be laced into socks, dish towels, toothbrushes. Even home appliances, heating and air systems will use it. Industrial uses too...treating water and cleaning food processing gear*” (see May 4, 2001 issue). Of course, silver is already used as a sanitizing agent in spas and hot tubs (and even some swimming pools) across America, by people who prefer not to use harsh chemicals such as chlorine and bromine. Silver is incredibly effective at preventing the growth of infectious microorganisms in water!

Even the ancient Chinese used silver to heal infectious illnesses, by rubbing it into the skin, sucking on it, or even grinding it up and ingesting it with water or other liquids. And during the Black Plague of the 17th century, British royalty (who had long been in contact with the Chinese) discovered that they could protect themselves by cooking their foods in silver containers, dining from pure silver plates and using only the purest of silver eating utensils – all of which allowed them to ingest microscopic quantities of pure silver with every meal. This tactic has been widely credited with keeping the British royals virtually immune to the Black Plague, while literally hundreds of thousands of English commoners who had no access to silver died!

The Advent of Modern Colloidal Silver!

Fortunately, about 90 years ago, a simple method was discovered by which virtually invisible microscopic particles of silver – called “silver ions” – could be driven off pure silver wire by low voltage electricity, and suspended in distilled water by the resulting electrical charge! This safe liquid solution came to be known as *colloidal silver*, and it soon took the medical community by storm. We’ll tell you more about how colloidal silver is made in just a moment. But first, it is important to understand how quickly this discovery impacted the medical community. In fact, by 1919 Alfred Searle, founder of the international pharmaceutical conglomerate Searle Pharmaceuticals, wrote a medical volume called “The Use of Colloids In Health and Disease,” in which he enthusiastically stated, “*Applying colloidal silver to human subjects has been done in a large number of cases with astonishingly successful results. For internal administration...it has the advantage of being rapidly fatal to pathogens without toxic action on its host. It is quite stable. It protects rabbits from ten times the lethal dose of tetanus or diphtheria toxin.*”

During that same time period, Dr. Henry Crooks, M.D., a pioneering researcher on colloidal silver and its medical uses wrote, “*I know of no microbe that is not killed by silver in laboratory experiments in six minutes.*” And by 1923 the British Medical Journal had discovered the antibiotic properties of colloidal silver, stating in their February issue, “*...it has been shown repeatedly that the rapidly exerted disinfectant action is of considerable therapeutic value.*”

But during the 1940's, after the introduction of modern prescription antibiotic drugs such as penicillin, colloidal silver usage by the medical community slowly fell to the wayside. The major pharmaceutical firms quickly discovered that the patents they held on newly emerging antibiotic drugs could earn them tens and even hundreds of millions of dollars in profits annually, whereas safe natural substances such as colloidal silver, which cannot be patented, held nowhere near the same profit potential. Hence, the major pharmaceutical conglomerates launched a worldwide PR campaign claiming that infectious illness would soon be wiped from the face of the earth thanks to their new antibiotic drugs. Americans, as well as the people of virtually all other nations, bought the story hook, line and sinker. And the medical use of colloidal silver lapsed completely from view as the antibiotic drug craze began in earnest.

Of course, the promise of wiping out infectious disease from the face of the earth with antibiotic drugs was never quite fulfilled. And by the early 1970's the first antibiotic-resistant "super pathogens" began to appear on the scene. Doctors were astounded to discover that many infection-causing pathogens were no longer killed by antibiotic drugs. The major pharmaceutical firms reacted quickly by beginning a crash program to develop newer and even more powerful antibiotic drugs. But even back then, the antibiotic-resistant bacteria continued to evolve until they were no longer affected by the newest antibiotic drugs on the market. A small handful of savvy researchers realized that the pharmaceutical firms had merely entered into a race against time, in which they would constantly have to develop more and more powerful antibiotic drugs just to keep up with the rapidly evolving super pathogens. Because of this, these prescient researchers decided to look *back* in history for a remedy, rather than forward. They asked themselves, "How did our ancestors survive serious infectious illness?" And the answer they came up with surprised them all: *silver!*

The Medical Community Re-Discovers Colloidal Silver!

In March 1978 the prestigious *Science Digest* put the medical spotlight back on silver's powerful infection fighting qualities, stating, "*Silver is our mightiest germ fighter...It is re-emerging as a wonder of modern medicine. An antibiotic kills perhaps a half-dozen different disease organisms, but silver kills some 650. Resistant strains fail to develop...Even tiny amounts of silver wipe out huge quantities of disease organisms...Moreover, silver is virtually non-toxic.*"

By the early 1980's the famous Dr. Robert O. Becker of Syracuse University Medical Center was studying the antibiotic properties of electrically generated silver ions in earnest. He later wrote in his best-selling book **The Body Electric**, "*What we have done was rediscover the fact that silver killed bacteria, a fact which had actually been known for centuries...All of the organisms we tested were sensitive to the electrically generated silver ion, including some that were resistant to all known antibiotics...In no case were any undesirable side effects of the silver treatment apparent.*"

Then, in 1988 Dr. Larry C. Ford, M.D. of the UCLA School of Medicine, discovered through laboratory testing that 650 different bacteria, viruses or fungi were unable to live in the presence of colloidal silver. In most cases, he found that they were killed within *six minutes of direct contact* – a discovery that had originally been made by Dr. Henry Crooks, M.D. back in the 1920's!

As Dr. Joseph Weissman, M.D. board certified immunologist and Assistant Clinical Professor at the University of California Medical School would later write, "*Today, many antibiotics are losing the battle with germs. Fortunately, the best germ killer, which was discovered over 2,000 years ago, is finally getting the proper attention from medical science — natural silver. I sincerely recommend that everyone have electrically generated colloidal silver in their home as an antiseptic, antibacterial and antifungal agent.*"

Colloidal Silver Can Even Kill Germ Warfare Agents Used By Terrorists!

It is also important to note that colloidal silver was one of the few substances on earth that was successfully used against *anthrax* and other plague-like pathogens in the early 1900's prior to the advent of modern-day antibiotics, as

verified by the book *Colloids in Biology and Medicine* by H. Beckhold, pages 367-368. Considering that *anthrax* is said to be the all-time favorite biological warfare agent of terrorists associated with Osama bin Laden and Saddam Hussein, it would seem to be a prudent measure indeed to have plenty of therapeutic-quality colloidal silver on hand at home in order to help protect yourself and your family in the event of a terrorist biological attack on U.S. cities.

Former CIA microbiologist Larry Harris has been a major proponent of the use of colloidal silver, particularly in cases where antibiotic drugs are not available. When asked whether there were any *natural* substances that could protect the population against anthrax and other germ warfare agents, he stated, "*The only natural substance I know of that is effective against these microbes is colloidal silver. I tested that myself when I was with the CIA, and found it effective against both anthrax and the bubonic plague pathogen.*" Harris is said to have re-tested colloidal silver against anthrax in his private laboratory in 1997, and again found it to be highly effective. According to Harris confidant Mike Seiler, "*In laboratory tests, Harris definitely confirmed colloidal silver kills the anthrax pathogen. He used the minimum inhibitory test, in which he took ten vials of anthrax and put correspondingly higher concentrations of colloidal silver in each vial until he determined which concentration gives an effective kill rate. Harris discovered the kill rate was at 100 parts per billion — an amazingly small amount of colloidal silver.*"

Not only has colloidal silver been demonstrated to be effective against anthrax in the laboratory, the historical medical literature also lists it as an effective recourse against four more of the most popular pathogenic microorganisms used by terrorists as bio-warfare agents: *diphtheria, influenza, whooping cough (pertusis) and typhoid* — reason enough in anyone's book to have a plentiful supply on hand, especially in light of the growing plagues already upon us, and the trying times ahead.

Decontaminates Water...Knocks Out Food Poisoning...Obliterates Infections!

In short, colloidal silver is a safe, virtually non-toxic and completely *natural* antibiotic that has been recognized by medical science for over ninety years! And experts say colloidal silver is the perfect product for ridding contaminated drinking water of infectious microorganisms, or keeping your fresh drinking water supplies from becoming contaminated during an extended emergency or crisis. In one recent test, several two-ounce batches of toilet water were lab-tested and found to contain a contamination level of 2400 Colony Forming Units (CFU) of bacteria per ml. One tablespoon of homemade colloidal silver was added to each of the batches of toilet water, and both batches were again lab tested. This time the laboratory found no *detectible CFU*. The bacteria-laden toilet water had been fully decontaminated!

Furthermore, colloidal silver has long been recognized by medical experts as one of the most potent antidotes on earth for food poisoning. During a protracted crisis (such as a natural disaster, power blackout or an unexpected terrorist attack) when antibiotic drugs may not be available and the quality of foods is likely to be suspect because electric power and refrigeration may not be available for extended periods of time, it is absolutely *vital* that you and your family have the most effective *natural* protection possible in case of food poisoning. Experts say colloidal silver is literally one of the most potent food poisoning remedies money can buy.

But clearly colloidal silver's most important benefit is its innate ability to literally decimate infectious microorganisms and eradicate many types of infectious disease in humans. In just a moment, we'll show you how you can start making your own colloidal silver in the comfort and privacy of your own home, for *only pennies per batch!* But first, here is a list of over 100 of the pathogenic microorganisms and serious disease conditions which colloidal silver was documented prior to 1938 to be effective against [spellings as cited in the old medical texts]:

1. Anthrax Bacilli
2. Appendicitis
3. Axillae and blind boils of the neck
4. B. Coli
5. B. Coli Communis
6. B. Dysenteria
7. B. Tuberculosis
8. Bacillary Dysentery
9. Bladder Irritation
10. Blepharitis
11. Boils
12. Bromidrosis in axillae

13. Bromidrosis in Feet
14. Burns and wounds of the cornea
15. Cerebro-spinal Meningitis
16. Chronic Cystitis
17. Chronic Eczema of anterior nares
18. Chronic Eczema of metus of ear
19. Colitis
20. Cystitis
21. Dacryocystitis
22. Dermatitis suggestive of toxaemia
23. Diarrhoea and Diptheria
24. Dysentery
25. Ear Affections
26. Enlarged Prostrate
27. Epiditymitis
28. Erysipelas
29. Eustachian tubes (potency restored)
30. Follicular Tonsilitis
31. Furunculosis
32. Gonococcus
33. Gonorrhoea
34. Gonorrhoeal Conjunctivitis
35. Gonorrhoeal Ophthalmia
36. Gonorrhoeal Prostratic Gleet
37. Haemorrhoids
38. Hypopyon Ulcer
39. Impetigo
40. Infantile Disease
41. Infectedulcers of the cornea
42. Inflammatory Rheumatism
43. Influenze
44. Interstitial Keratitis
45. Intestinal troubles
46. Lesion Healing
47. Leucorrhoea
48. Menier's Symptoms
49. Nasal Catarrh
50. Nasopharyngeal Catarrh (reduced)
51. Oedematous enlargement of turbinates without true hyperplasia
52. Offensive discharge of chronic suppuration in Otitis Media
53. Ophthalmology
54. Ophthalmic practices
55. Para-Typhoid
56. Paramecium
57. Perineal Eczema
58. Phlegmons
59. Phlyctenular Conjunctivitis
60. Pneumococci
61. Pruritis Ani
62. Puerperal Septicaemia

63. Purulent Ophthalmia of infants
 64. Pustular Eczema of scalp
 65. Pyorrhoea Alveolaris (Riggs disease)
 66. Quinsies
 67. Rhinitis
 68. Ringworm of the body
 69. Scarletina
 70. Sepsis
 71. Septic Tonsilitis
 72. Septic Ulcers of the legs
 73. Septicaemia
 74. Shingles
 75. Soft sores
 76. Spring Catarrh
 77. Sprue
 78. Staphyloclysin (inhibits)
 79. Staphylococcus Pyogenea
 80. Staphylococcus Pyogens Albus
 81. Staphylococcus Pyogens Aureus
 82. Streptococci
 83. Subdues inflammation
 84. Suppurative Appendicitis (post-op)
 85. Tinea Versicolor
 86. Tonsilitis
 87. Typhoid
 88. Typhoid Bacillus
 89. Ulcerative Urticaria
 90. Urticaria suggestive of toxaemia
 91. Valsava's inflammation
 92. Vincent's Angina
 93. Vorticella
 94. Warts
 95. Whooping Cough
- More recent articles have described silver being used to successfully treat:
97. Adenovirus 5
 98. Aspergillus Niger
 99. Bacillus Typhosus
 100. Bovine Rotovirus
 101. Candida Albicans
 102. Endamoeba Histolytica
 103. Escherichia Coli
 104. Legionella Pneumophila
 105. Poliovirus 1 (Sabin strain)
 106. Pseudomonas Aeruginosa
 107. Salmonella
 108. Spore-forming Bacteria
 109. Staphylococcus Aureus
 110. Streptococcus Faecalis
 111. Vegetative B. Cereus cells

If Colloidal Silver Is So Great, Then Why Is It So Darn Controversial?

So why *is* colloidal silver so controversial? Over the past few decades millions of Americans have become disgusted with the orthodox medical system, its high costs, and its emphasis on dangerous prescription drugs and indiscriminate surgeries. As a result they have moved quietly into the alternative medicine camp, with its emphasis on disease prevention and safe natural remedies that have worked for thousands of years.

And as they have grown more knowledgeable about alternative medicine, many Americans have practically abandoned the use of prescription antibiotic drugs and have turned instead to the use of safe, natural colloidal silver. In fact, when people discovered they could cure the vast majority of their own infections -- quickly, safely and effectively -- with a few dollar's worth of colloidal silver, word began to spread rapidly among the American public. The giant pharmaceutical companies quickly realized they would soon be losing tens of millions of dollars annually in sales of their expensive prescription antibiotic drugs if they didn't do something about it. Initially, they demanded that the FDA ban the sale of colloidal silver altogether. But try as they might, the FDA couldn't find sufficient grounds for a ban. After all, colloidal silver has a fully documented 90-year medical history of safety and effectiveness against pathogenic microorganisms.

Not to be stopped, the big drug firms rapidly switched gears: they began pressuring the FDA to restrict the public's access to *information* about colloidal silver. **They simply didn't want any more people to learn how powerful and effective colloidal silver really is against infectious microorganisms and the deadly diseases they can cause.** And in a move that has stunned the medical community, the FDA promptly bowed to the wishes of the global pharmaceutical giants, placing into law the infamous new "Final Ruling" on colloidal silver in July 1999.

How could this happen in America today? Unfortunately, it has become abundantly clear that the FDA is now little more than the enforcement arm of the major drug companies! Literally billions of dollars in profits are pocketed annually by these pharmaceutical giants thanks to the monopoly they hold on the sale of expensive prescription antibiotic drugs. *And colloidal silver is considered to be the biggest threat to that multi-billion dollar annual monopoly on prescription antibiotics.* Of course, anything that threatens those kinds of profits -- and promises to put the power to heal serious infections back into the hands of average Americans -- must be regulated into oblivion. And the FDA's perverse "medical g stapo" is now attempting to do just!

And now you know why colloidal silver has become so controversial. The major drug conglomerates want knowledge of this powerful natural antibiotic wiped from the face of the earth! And the FDA is working overtime to bring their wishes to pass by raiding and shutting down companies that sell colloidal silver and try to educate the public about its many infection-fighting qualities.

The Good News: Now You Can Make Your Own Colloidal Silver Quickly and Easily for Only Pennies!

The good news is this: In spite of the FDA's ongoing war against colloidal silver, and in spite of the likelihood that they will one day ban its sale altogether, you will *never* have to do without colloidal silver again if you learn how to make it yourself! In fact, literally thousands of Americans have been quietly making their own colloidal silver at home for many years, using it to safely and effectively knock out stubborn bacterial, viral and even fungal infections of all sorts -- *without having to resort to the use of potentially dangerous prescription antibiotics or anti-fungal drugs.* In fact, one of our readers recently told us how he has successfully used his homemade colloidal silver to knock out a stubborn fungal infection his doctors couldn't cure. Another has told us how he has used homemade colloidal silver over the past few years to obliterate strep throat infections, pink eye, upper respiratory infections, colds, the flu, and numerous other maladies among family members and friends!

And now, *you too* can learn the secret of making your own safe, natural high-quality colloidal silver for *only ten or twelve cents per quart batch* compared to the exorbitant prices charged by health food stores and internet vendors (which often charge as much as \$26 to \$36 for a tiny four-ounce bottle)!

You see, a number of bright researchers (including the renowned physicist Dr. Robert Beck) have developed very simple, small electronic appliances called colloidal silver generators. These machines are generally so small they can easily be held in the palm of your hand. And they are able to make anywhere from 16 ounces of colloidal silver at a time, to a quart, or even a gallon, depending upon which type colloidal silver generator you own. Amazingly, some of these phenomenal little machines can make 16 ounces of pure colloidal silver in under ten minutes, or even a gallon or more in less than an hour. And they are so safe and simple to use, it is amazing. **In fact, making safe pure colloidal silver is just about as easy as making a cup of tea!**

These highly effective home units are what thousands of savvy health-conscious Americans have quietly been using for years to make their own high-grade, therapeutic-quality colloidal silver!

The more we looked into this situation, the more intrigued we became. We found that the colloidal silver made with these little units is as pure and effective as the best commercial colloidal silver products on the market. And by owning your own home colloidal silver generator, a future FDA ban on colloidal silver will not affect you one bit! Why? Because you'll have the means of production in your own hands! You'll never be without colloidal silver again!

**Introducing: The World's Finest Home Colloidal Silver Generators
by The Silver Edge Health & Nutritionals!**

During the course of our research into colloidal silver, we ran across a very interesting company called The Silver Edge Health & Nutritionals. They are based in Phoenix, Arizona, and they distribute five different models of colloidal silver generators — the very best on the market! They literally have colloidal silver generators for every possible need. These are small counter top devices that allow you to make as much colloidal silver as you could ever want, for *only pennies per batch!* Keep in mind that a tiny four ounce bottle of colloidal silver now sells commercially for anywhere between \$26 to \$36 or more. But with your own home colloidal silver generator, you can make four times that amount of pure, fresh, high-quality colloidal silver at a time -- in just minutes, for about *fifteen or twenty cents*. And you can do it over and over again for years on end! There is literally no limit to how much colloidal silver you can make when you own your own home colloidal silver generator!

The colloidal silver generators distributed by The Silver Edge Health & Nutritionals come fully assembled and ready to work. And as we mentioned earlier, *they are as easy to use as making a cup of tea*. Only instead of tea, you get pure, therapeutic-quality colloidal silver! Plus, to help insure maximum absorption and effectiveness, their units are specially calibrated to produce an extremely small particle size range (see enclosed brochure for details). If you know anything about colloidal silver, you know how important this is!

We're so enthused about the unique line of high-quality home colloidal silver generators offered by The Silver Edge Health & Nutritionals, we've arranged a special deal for our readers in which you can purchase a brand new home colloidal silver generator at a steep discount from the normal retail price – but *only* for the next 15 days, and *only* for readers of Life & Health Newsletter.

In fact, by acting quickly, you can save anywhere from *\$20 to \$100 per generator*, depending upon which model you choose. For example, their most popular model, the Battery Operated Home Colloidal Silver Generator (see enclosed brochure for details) has been reduced in price from the regular \$149.95 to *only \$129.95*. You save a full \$20 by acting within the next 15 days! Or, purchase two of these wonderful little units and pay only \$99.95 *each* – a savings of \$50 per generator! As you'll see when you take a look at the enclosed brochure, even their brand new Micro-Particle Home Colloidal Silver Generator – the top choice for anyone fighting a chronic degenerative disease caused by hidden underlying *mycoplasmas* infections – has been reduced in price from \$329 to *only \$229*. That's a whopping \$100 savings if you act quickly and decisively! So please don't procrastinate if you're at all interested in this special strictly time-limited money-saving offer we have arranged for our readers with the good folks at The Silver Edge Health & Nutritionals. Take a look at their enclosed brochure right away, and check out the BIG savings on all five models of their high-quality home colloidal silver generators!

Considering the growing war against colloidal silver being conducted by the FDA on behalf of the major pharmaceutical companies, and the very real possibility of an upcoming FDA ban on the sale of colloidal silver in the near future (not to mention the potentially life-saving value of having uninterrupted access to pure, therapeutic quality colloidal silver any time you need it), we can't emphasize enough how invaluable one of these inexpensive little devices could be. The very day we spoke with the good folks at The Silver Edge Health & Nutritionals and learned about their devices, we ordered one of each model and have used them regularly ever since. And we couldn't be happier. And at the specially discounted prices we have arranged for you, we think you should order at least one for your own family, and perhaps one or more extra as a gift for friends or loved ones too!

When you consider the exorbitant prices charged for colloidal silver in health food stores (as much as \$26 to \$36 per four-ounce bottle) you'll quickly see that these units allow you to recoup the entire cost of your new generator after making only two or three batches! And these handy little devices can make literally gallons and gallons of the highest-quality colloidal silver, *for years on end*. They are literally built to last for a lifetime. And all you have to do is replace the two .999 fine pure silver rods once a year or so (depending upon how frequently you make colloidal silver), for about \$15 from the distribution company.

**Your Risk-Free 100% Money-Back Guarantee, One Year Warranty
and FREE "Most Frequently Asked Questions & Answers" Special Report!**

Best yet, each of the top-quality, carefully-engineered colloidal silver generators distributed by The Silver Edge Health & Nutritionals come with a **no-nonsense 30-day, 100% money-back guarantee of complete satisfaction**. Use the product entirely at their risk for 30 days. Test it out thoroughly to make sure you are completely satisfied. If you're dissatisfied for any reason, simply return the generator and supplies to them in good condition within 30 days, for a full 100% refund of your purchase price -- no questions asked! Furthermore, each generator comes backed by an unprecedented **ONE YEAR "NO EXCUSES" WARRANTY** against defects in parts and workmanship. If the unit fails for any reason (other than damage by the customer), The Silver Edge Health & Nutritionals will fix it for FREE, or at their discretion send you a brand new generator in replacement. In short, you just can't go wrong. You have absolutely nothing to risk. And you'll gain the ability to make colloidal silver *any time you want it*, in the comfort and privacy of your own home, for the rest of your life. Plus, you'll never again have to pay those exorbitant health food store prices for this potentially life-saving infection-fighting nutritional supplement. Instead, you'll be able to make it yourself for *only pennies*. And if the FDA bans colloidal silver in the future, it won't affect you one bit because you'll always have the means of production right at your fingertips thanks to your brand new home colloidal silver generator!

To order one or more of these amazing new devices at some of the steepest discount prices ever, just take a look at the accompanying brochure from The Silver Edge Health & Nutritionals and choose the unit that best fits your needs. They even have an emergency preparedness SOLAR home colloidal silver generator *that runs off of sunlight!* That's right, with this unique new unit you don't need batteries or household electricity to make colloidal silver. You'll be able to make colloidal silver anytime time you want simply by setting the solar panel in a sunny window and letting the unit run on sun-power!

What's more, each of their units come with **complete and easy-to-follow instructions**, and a **set of pure .999 fine silver wire** which should last you for over a year under normal usage. And if you place your order within the next 15 days, you will get a FREE handy "zipper pouch" carrying case for your generator, and a detailed 8-page "Most Frequently Asked Questions & Answers About Making and Using Colloidal Silver" report **absolutely FREE!**

In the wake of the recent FDA raid against Seasilver USA and their accelerating war against colloidal silver, this may be the most important issue of Life & Health Newsletter we've ever published. We can only urge you to act quickly and decisively while this strictly time-limited money-saving opportunity is still available. We strongly urge you to check out the enclosed brochure from The Silver Edge Health & Nutritionals right away, and then call them at **1-800-528-0559** and order the home colloidal silver generator of your choice. You'll be glad you did, we promise!
